PROFESSIONAL SUMMARY

Integrated M.Tech Software Engineering student with hands-on experience in software development, automation testing, Android application development, and data analysis. Skilled in Java, Python, SQL, Selenium WebDriver, Firebase, and Unity-based application development. Experienced in building user-focused applications, performing functional testing, and analyzing real-world datasets. Interested in Software Development, QA Automation, and Data Analytics with strong problem-solving and collaborative skills.

SKILLS

- **Programming Languages:** Java, Python, SQL, C#, JavaScript
- **Web Technologies:** HTML, CSS
- **Software Testing & QA:** Selenium WebDriver, Manual Testing, Functional Testing, Automation Testing, API Testing, Test Case Design, Bug Tracking
- **Application Development & Technologies:** Android Development, Firebase, Unity (AR/Simulation), Mobile Application Development
- **Data & Analytics:** Data Analysis, Data Processing, Python for Data Analysis, Jupyter Notebook, Google Colab
- **Tools & Platforms:** Android Studio, Unity, Firebase Realtime Database, MS Office
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures, SDLC, Problem Solving, Debugging

PROFESSIONAL EXPERIENCE

Data Analysis Intern – **Amitysoft Technologies Pvt Ltd, Chennai** **(Dec 2025 – Feb 2026)**

- Worked on reagent usage data acquisition and analytics for diagnostic laboratory instruments
- Analyzed periodic consumption data to identify usage trends and support inventory planning
- Processed and organized operational datasets to improve forecasting accuracy for reagent supply management
- Assisted in generating analytical insights for efficient resource utilization and reporting

PROJECTS

AR-Based Smart Guidance System | Technologies: Unity, C#

- Built a Unity-based smart guidance system designed to assist children in understanding daily environments and activities
- Implemented room-based navigation and object-triggered guidance using interactive virtual assistance
- Designed step-by-step interaction workflows to improve accessibility and user engagement
- Worked on AR-based interaction and navigation concepts for environment understanding

Smart Bus Allocation System | Technologies: Android, Firebase

- Developed an Android application with role-based authentication for students and administrators
- Implemented bus request and allocation management features for efficient transportation handling
- Integrated Firebase Realtime Database for real-time data synchronization and management
- Improved usability through centralized monitoring and request processing

AI Chatbot for Friendly Conversation | Technologies: Python, NLP

- Built a conversational chatbot using Python and basic Natural Language Processing techniques
- Implemented user input handling and response generation for interactive communication
- Improved conversational flow and response handling through text-processing logic
- Executed and tested the chatbot in a Python-based development environment

EDUCATION

M.Tech Software Engineering (5-Year Integrated Programme) **Expected Graduation: 2027**
Vellore Institute of Technology, Chennai

CERTIFICATIONS

- **Diploma in Software Testing (Hybrid Mode)** – Amitysoft Technologies Pvt Ltd, Chennai **(May 2024 – Aug 2024)**
- **Data Analysis with Python** – IBM (Cognitive Class) **(2026)**
- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** – Oracle **(2025)**
